Reliable 1" hook and loop sealing system

The unique roll-up bar over-centers at the rear holding the cover tight

Tested and proven to provide years of service in all four seasons

Heavy Duty aluminum rails, bars, and bows

QUALITY FEATURES

Versatility and function

The roll-up bar, bows, and cover easily roll up together and out of the way in seconds and stores neatly

behind the cab of your pickup with quick release straps. When you need to haul something large or get into your truck bed, LiteRider® Cover makes it easy and fast.

3-Point locking system

After the cover is secured in place by the auto-latch, the Slide Locks offer an additional lock. They are located at the rear of each corner. To operate simply push to lock, pull to unlock. If your truck does not have a locking tailgate, you can purchase an optional tailgate lock; this lets you lock your tailgate in addition to locking the cover.

Slanted (angled) rail design

specifically engineered to deliver more function and style. It is Accessory Friendly-allowing plenty of room for bed rails,

while still allowing you room to seal the cover. Easier Operation-the slanted design makes opening and closing the cover easier and longer lasting. The heavy-duty rails are durable and the Sleek Appearance contours to the design of the truck bed.

Packaged for a fast and easy clamp on

installation. It simply clamps on to the inside lip of your pickup bed with clamps specifically designed for the LiteRider®. The tough tubular bows are attached to

the cover and roll-up with it. When closed the LiteRider® Cover can hold heavy snow, even in the mountains.

Adjustable Tension:

The tension adjusters allow you to fine tune the cover tension with the turn of a dial. Giving you control over your cover tension, not the weather. No tools are needed. Just turn the dial to tighten your cover and feel good knowing you have the **tightest cover made**. Tested and proven to provide years of service in all four seasons.

Angled Roll-Up Bar

The unique roll-up bar over-centers into the strikes, pulling the cover tight from the front to rear. Giving you the **tightest soft cover made**.

Plus the cover is wrapped around the anodized aluminum roll-up bar for better styling and a tight seal over the tailgate.

THE PROVEN TRUCK COVER THAT KEEPS WORKING FOR YOU™
