

# SNOWSPORT™

## PERSONAL UTILITY PLOW

### EASY TO...

- **INSTALL** - attach the front mount to the vehicle and assemble push frame
- **USE** - once the front mount kit is installed, just insert the push frame into the receiver, hang the plow blade and you're ready to work
- **MAINTAIN** - no electrical or hydraulic components to freeze, malfunction, or wear out
- **STORE** - in between jobs or during off season - lightweight enough for easy one person handling

### ADDED VALUE...

- One of the easiest and most affordable snow plows you'll ever use
- Versatility for farmers, home owners, contractors, and business owners
- Works great on cement, black top, gravel or grass surfaces
- Clean - simple design, perfect for your personal vehicle
- Attractive clear anodized aluminum blade
- No wiring or lever controls to clutter the interior of your cab
- Simple to transfer from vehicle to vehicle

### SPECIFICATIONS...

- Anodized 6063-T6 aluminum extruded blade
- Low profile plow 7' wide x 18" high x 3" thick
- Heavy duty 1" rubber cutting edge
- Plow hooks into front mounting kit
- Blade weight approx. 110 lbs.
- Shipping weight approx. 215 lbs. including receiver hitch
- Typical vehicle application guide available

## Operates In Three Easy Steps!

### LOWER IT

Lift one end of blade at a time and lower over push frame guide.

### PLOW IT

Just drive and let the blade do the work.

### RAISE IT

Lift one end of blade at a time into holders and secure with snap pins.
